

## Robot vacuum cleaner robot Roidmi Eve Plus

Robot vacuum cleaner robot Roidmi Eve Plus

Ref: 6970019145723

Cleaning robot with emptying station Roidmi Eve Plus

The device from Roidmi is a must-have for the modern home. The vacuum cleaner automatically returns to the base, has a self-emptying function, and allows you to vacuum and wet mop at the same time. Control via a dedicated app and voice assistants will allow you to take full control of the device, and the long run time will provide up to 250m<sup>2</sup> of clean surface. What's more, the 2700 pa suction power affects the Eve Plus' performance, and with the LDS laser, the vacuum will find its way perfectly into your apartment.

Mapping function

The advanced navigation system and 4th generation LDS laser will quickly scan your entire apartment and automatically create a map using the SLAM algorithm, with 40% more accuracy than the previous generation. If you have a two-story house, the device will create a separate map for each floor and automatically detect the cleaned space. In addition, it avoids obstacles thanks to special sensors and only drives into obstacles that are less than 2cm high. Meanwhile, the slim design allows Eve Plus to thoroughly clean the spaces under furniture.

No dirt will escape its attention

2700 Pa suction power together with a brushless motor make an unbeatable duo! The device thoroughly gets rid of dirt even from hard-to-reach places. Thanks to a special TOF sensor, the brush cleans the spaces along the walls and in the corners so you can be sure

that your apartment will be vacuumed thoroughly.

#### It will clean your floors

In addition to the vacuuming function, the Roidmi Eve Plus is also equipped with floor mopping capabilities. Thanks to 3 water dispensing modes, you can adjust the water level to the type of surface you are cleaning. What's more, the use of smart solutions allows you to control the amount of water distributed. As a result, you can be sure that the mopping pad is always moistened, and you don't have to worry about possible stains. The lowest dosage will work well for washing tiles, medium - for panels, and the highest water level will help take care of the cleanliness of tiles in the kitchen. The 250ml tank is enough to wash 250m<sup>2</sup> of surface, so you can successfully use it to wash floors in a large house.

#### Dedicated app

Enjoy the possibilities offered by the app! With its help you can manage the saved maps of your apartment - add room names, divide or combine them. Your child is sleeping and you don't want to wake him up? Set a virtual wall or forbidden zones so that Eve Plus excludes that space from cleaning. You can also schedule cleaning schedules, for even more control over the device.

#### It will empty the tank for you

The charging station is also a dust garbage can. When the dust tank is full, the vacuum will return to the station and empty it. The robot also has ozone anti-bacterial technology that removes unpleasant odors. Since the tube through which debris is discharged is shorter than in other robots, dust gets into the tank faster and does not block it. The 3-liter tank lasts for a month, so you don't have to worry about frequent cleaning of the tank. With this feature, you can go on vacation without worrying and your apartment will clean itself.

#### Up to 250m<sup>2</sup> of clean surface on a single charge

With a 5200mAh battery and an intelligent BMS battery management system, the Roidmi Eve Plus can run for up to 250 minutes. Such a long operating time allows you to clean up to 250m<sup>2</sup> of surface on a single charge. The device's battery is running low? No problem! The vacuum cleaner will find a charging station, and after renewing its energy, it will return to the place where it stopped working.

#### "Hey Alexa, start cleaning."

Take full control of your device! Roidmi Eve Plus works with Google Assistant and Amazon Alexa, which means you can control it by voice. With a simple command, you can start cleaning, stop it, or send the device back to the docking station. Even if you don't have a smartphone handy, you can control the Eve Plus without moving from your chair!

#### With attention to detail

The vacuum cleaner was designed with special attention to detail, so it impresses not only with its performance, but also with its modern design. The rotating brush roll and side brushes ensure thorough cleaning. Among other things, a power button has been placed on the top of the device for convenient operation, and the use of high-quality materials guarantees the durability of the product. Meanwhile, the slim design allows Eve Plus to clean surfaces under furniture.

#### Included

Cleaning robot x1

Automatic emptying station x1

Water tank x1

Side brush x2

Disposable mop x10

Mop x1
