Wireless earphones TWS EarFun Air Pro, ANC (black)

TWS EarFun Air Pro Headphones, ANC (black)

Immerse yourself in the world of music with the Earfun headphones. The set offers impressive sound thanks to 10mm drivers. In addition, the noise cancellation feature allows you to make phone calls in the urban jungle. They also stand out for their long operating time and fast charging. In addition, they are IPX5 water resistant and support voice assistant.

High-quality sound

Thanks to a partnership with Edifier, the headphones impress with incredible sound quality. The Air Pro use advanced QuietSmart ANC technology, so you can enjoy rich details without outside interference. In addition, the 10-millimeter drivers further contribute to crystal clear sound and deep bass.

Noise reduction

Now you can carry on conversations even in noisy environments and be sure that your caller hears you loud and clear. Each headphone has 3 microphones and uses noise reduction. As a result, ambient noise is muted and you can talk freely on the phone no matter where you are.

Dreamlike comfort

Earfun headphones are distinguished by their lightweight and ergonomic design, which translates into long-lasting comfort. In addition, they come with silicone overlays in 3 sizes for even greater comfort. In addition, the Air Pro are IPX5 water resistant. Rain, snow, sweat - Earfun headphones are ready for it! Enjoy the freedom of use!

Convenient operation

You no longer need to take your phone out of your pocket to answer an incoming call or skip a song. The headphones work with Siri and Google Assistant voice assistants, so with a simple voice command you can set a reminder, turn on navigation, or check your calendar. In addition, each headphone connects to your device independently, so you can use both at the same time or just one - the choice is yours!

Up to 32 h of uninterrupted music

Don't worry about suddenly discharged headphones. The Air Pro offer up to 7 h of operation in ANC mode, and 9 h when you turn off noise cancellation. If you use the charging case, then the operating time is up to 32 h. In addition, a USB-C cable is included for easy charging. After about 2h, the Air Pro will be ready to work again.
