Hobbywing QuicRun WP 880 80A regulator

Hobbywing's QuicRun series regulator redefines standards for durability and adaptation to a wide variety of RC modeling use conditions. Dedicated to managing two DC motors (with a combined maximum load of 80A), it demonstrates not only impressive water and dust resistance, but also versatility of use. Easy to use, it is user-friendly for drivers of all skill levels, while maintaining the high standard of quality for which HOBBYWING is recognized. It offers a number of safety features, such as protection against low voltage, overheating or loss of signal, and easy calibration.

□Manufacturer

□Hobbywing

□Model

□HW30120301

□Continuous current

□80 A

□Max. peak current

□400 A

□BEC voltage

- 6V
- BEC current
- 4A
- Length
- 46 mm
- Width
- 35 mm
- Height
- 26.5 mm
- Weight
- 75 g
- Control
- Bidirectional
- Brake
- Yes
- Sensor input
- No
- Programmable
- Yes
