Water flosser with nozzles set Bitvae C2 (black)

Bitvae C2 irrigator with nozzle set (black)

Want to take even better care of your teeth? With the Bitvae C2 irrigator it will be possible! It removes up to 99.9% of plaque and food debris, so you can enjoy a beautiful and well-groomed smile even when you wear braces. What's more, thanks to its water resistance and ability to change modes, you'll be able to customize the irrigator's performance. You also don't have to worry about frequent and difficult recharging, as it provides a long working time of up to 40 days.

Beautiful and healthy smile

A beautiful and healthy smile is everyone's calling card, and maintaining it is now easier than ever thanks to the Bitvae irrigator. This innovative equipment provides not only standard tips, but also a special tip for the tongue, which enables comprehensive hygiene of the entire oral cavity. Thanks to the precise action of the pressurized water jet, the Bitvae irrigator removes up to 99.9% of plaque and food debris, effectively reaching even the most inaccessible places, such as the spaces between braces. This makes the Bitvae irrigator not only a tool for daily dental cleanliness, but also the key to gum health and fresh breath.

Several modes of operation

The Bitvae irrigator can operate in different modes: soft, normal, potent. The soft mode (which generates a water pressure of 50-70 psi) is ideal for people who are just starting out with an irrigator or have sensitive gums. The normal mode (which provides a water pressure

of 70-90 psi) is perfect for daily care, providing effective removal of plaque and food debris. On the other hand, the potent mode (distinguished by a water pressure of 90-120 psi) is for those who appreciate an intensive cleaning of the oral cavity. Such a variety of modes allows you to adjust the operation of the device to individual needs and preferences, thereby increasing the comfort and effectiveness of daily hygiene..

Long working time

You don't have to worry about frequent charging of the irrigator. After one full charge, the device is able to last up to 40 days, which is especially convenient for frequent travelers. You'll find a cable included, which makes charging simple and convenient. In addition, the 300 ml water container provides enough liquid to thoroughly clean your mouth without having to refill it during a single use. This makes the Bitvae irrigator an extremely practical device tailored to the needs of even the most demanding users.

Waterproof

The Bitvae device is IPX7 certified, which means that it is completely waterproof. This means you can use it in the shower or wash it under running water without worry, making it easy to keep the irrigator clean. This water resistance also ensures greater safety during use, eliminating the risk of damage from accidental splashes.

Comfort of use

The Bitvae irrigator was created with comfort in mind, so its design is very ergonomic. What's more, its 360° rotating interchangeable nozzles will make its use even more pleasant. In addition, it will be great for traveling, as you can easily fit it in your backpack or larger cosmetic bag.

Easy cleaning

Thanks to the clever design of the device, the water container can be easily emptied and thoroughly washed, ensuring the highest level of hygiene. There are no complicated mechanisms or hard-to-reach places - everything is designed to make use and cleaning as simple and least time-consuming as possible. When you choose a Bitvae irrigator, you are choosing not only efficiency, but also everyday convenience.
