Remax RP-U37 wall charger, USB + USB-C, 18W (white)

Remax RP-U37 mains charger, USB + USB-C, 18W (white)

Remax RP-U37 network charger is a charging device that combines modern technology and convenience of use. What's more, this equipment is completely safe, so you don't have to worry about your devices. Learn more about the key features and functions of this charger and see what sets it apart.

Modern technology and versatility

The RP-U37 from Remax is a charger that offers users both a USB and USB-C port, ensuring compatibility with a wide range of devices. As a result, no matter what type of equipment you have, you can count on fast and efficient charging.

Charging performance and speed

The charger supports QC and PD fast charging protocols, meaning that it is able to significantly speed up the charging process for compatible devices. It offers output at USB: 5V/3A, 9V/2A, 12V/1.5A and USB-C: 5V/3A, 9V/2A, 12V/1.5A, which translates into fast and efficient power delivery to connected devices.

Safe to use

The flame-resistant PC material used for the charger's housing guarantees high resistance to heat and drops, which contributes to the

safety of its use. In addition, the Remax RP-U37 charger is equipped with a number of safety features that protect both the devices being charged and the charger itself from damage.

Comfort of use

The Remax RP-U37 charger is a device that, thanks to its versatility, performance and safety, is an excellent choice for anyone looking for a reliable mains charger. Modern technology, the charging protocols used and high-quality materials make it a recommended product for those who value convenience and speed of charging.
