

## Microphone Jack Puluz 1.5m jack 3.5mm PU424

Microphone Jack Puluz 1.5m jack 3.5mm PU424

Ref: 5907489605373

### Crystal clear sound

The PU424 is equipped with a high-quality capacitive core, so the sound received is clear and distortion-free. The omnidirectional microphone is characterized by the fact that it captures sound from all sides and is very sensitive to voice recognition. In addition, with the noise cancellation function, the device mutes ambient noise and the received sound is crystal clear. The recommended sound collection distance is a maximum of 20 cm. Moreover, the device is energy efficient.

### High build quality

The microphone is made of high quality materials, making it durable and resistant to damage and shock. Two wind shields have been included to reduce outside noise, such as strong gusts of wind.

### Wide application

The condenser microphone from Puluz is perfect for many situations. You can use it to record videos or live broadcasts, for example on Amazon Live or TikTok. You can also use the PU424 for business meetings, online lectures, YouTube videos, or interviews with journalists. With the clip that attaches to your clothing, you can record cooking vlogs, for example, and rest assured that your voice will always be heard, without interference. The long microphone cable makes it even more comfortable to use.

### Plug&Play

Installing the microphone is very easy and fast. With the 3.5mm port, you don't need any drivers or software to install the microphone. Just plug the microphone into the device of your choice and select the PU424 as input in the system settings and you're done. Additionally, the device is compatible with operating systems such as iOS, Android and Windows as well as an external sound card.

### Included

Microphone x1
