

Vacuum cleaner Deerma DX600 (black)

Vacuum cleaner Deerma DX600 (black)

Ref: 6955578035869

Deerma DX600 upright vacuum cleaner

Soon every corner of your home will be sparkling clean. The Deerma DX600 upright vacuum cleaner operates at 600 Watts and offers improved cyclonic technology to eliminate dust and waste in a flash. The included interchangeable brushes will also make cleaning easier for you. The 4 stage filtration effectively removes dirt and allergens. Lightweight and handy, the long 4.5-meter cord makes the Deerma DX600 suitable for both upright and handheld vacuum cleaning.

Reliable vacuuming

Dust, pollen, dust mites, hair and other debris not only pollute our homes, but also often trigger allergies. The DX600 can help you solve these problems! Thanks to improved cyclonic technology, the suction power is increased up to 15,000 Pa. In addition, a steel mesh with 12,999 0.25 mm diameter holes prevents dust from clogging the filter for reliable performance.

The perfect floor brush

Now you can thoroughly vacuum the floors throughout your home. The DX600 is thin enough to easily get under furniture - it's less than 18mm thick. It also swivels 270°, making it easy to clean between chair legs and in corners of rooms. Its carefully considered design combined with the big suction power of the vacuum cleaner allows you to effectively eliminate even extremely stubborn dirt hidden in crevices.

4-stage filtration

With the DX600, you'll not only vacuum your floors thoroughly, but also create a clean, safe environment in your home. The device is equipped with a 4-stage HEPA filtration system that effectively traps dust particles and prevents them from re-entering the air. The applied solutions will be appreciated especially by allergy sufferers and parents of small children.

2in1

Did you know that when you buy the DX600, you get 2 practical devices in one? The product can be used as a normal upright vacuum cleaner and a small handheld vacuum cleaner. This makes it ideal not only for vacuuming your floors, but also for cleaning furniture, curtains and even your car. The DX600 is also extremely lightweight so it's easy to pick up. As a handheld it weighs only 1.4 kg and an upright 2 kg. What's more, its ergonomic non-slip handle makes it easy to manoeuvre.

Interchangeable brushes included

To make it easier for you to thoroughly vacuum all the nooks and crannies, the kit includes additional interchangeable brushes. With the crevice brush, you can easily get rid of dust, for example, from the recesses in sofas or armchairs. It will also come in handy when cleaning narrow, hard-to-reach areas. The small cleaning brush makes it easy to vacuum furniture and uneven, delicate surfaces such as keyboards or curtains.

For your safety

The DX600 vacuum cleaner will serve you well for a long time. It is made from high grade materials such as stainless steel, which makes it extremely durable and resistant to wear and tear. It is also designed to effectively protect the motor from overheating and damage. A special three-dimensional vent ensures efficient heat dissipation. It has been placed at the back so that the released air does not blow into your face.

Large dust container

The Deerma DX600 vacuum cleaner is equipped with a large 0.8 litre dust container. To empty it, simply detach it from the device by pressing the button. Then simply throw the waste into the garbage can - you won't even get your hands dirty! You can also wash the tank under running water without any worries and reuse it after drying - this way you will prolong its life and avoid the multiplication of bacteria.
