FairyWill 5020E irrigator

Now you can take even better care of your oral hygiene. The FairyWill 5020E irrigator offers 3 modes to choose from and allows you to clean your teeth thoroughly. It removes up to 99.99% of impurities. It is equipped with a 300 ml water tank, the refilling of which will not cause you any problem. The set includes up to 8 interchangeable nozzles, so your whole family can use the irrigator.

Thorough cleaning

The irrigator effectively eliminates up to 99.99% of food debris and tartar, while providing a deep gum massage and improving circulation. Thus, it allows you not only to clean your teeth thoroughly, but also to improve their condition. Improved pulsation technology makes the water jet at a pressure of 30-100 PSI reach even those areas of the mouth that an ordinary toothbrush cannot reach.

3 operation modes

Customize the irrigator's operation to suit your needs. The device offers 3 cleaning modes. CLEAN mode is ideal for everyday use. Water pulsing at a rate of 1800 times per minute will effectively clean your mouth. Soft mode is suitable for novice users and people who have sensitive teeth. The frequency of 1400 times per minute allows for thorough yet gentle cleaning. Massage mode (1400-1800 times per minute) will allow you to clean your teeth thoroughly while providing a gum massage.

Practical water tank

The irrigator is equipped with a large water tank with a capacity of 300 ml. This is enough to allow you to brush your teeth thoroughly without having to refill it. If necessary, you can easily clean it, thus preventing the proliferation of bacteria. What's more, thanks to its improved design, the reservoir doesn't leak, and filling it with water is child's play and quick.

8 interchangeable nozzles included

You will find up to 8 different nozzles for your irrigator in the set. Among others, you'll find a tongue cleaner tip, a periodontal tip to help remove food debris from hard-to-reach places, and a tip dedicated to people with braces. The set also includes 5 standard nozzles, which are great for everyday oral cleaning. This way your whole family can use it to brush their teeth. All tips are relatively long and rotate 360°, allowing you to reach even hard-to-reach areas of the mouth. Note: to avoid the proliferation of bacteria and maintain hygiene, we recommend replacing the nozzle every 3 months or so.

Long working time

The cordless design of the irrigator gives you almost unlimited freedom. The device is equipped with a long-lasting lithium battery, allowing it to run for up to 21 days on a single charge. To charge it, simply connect it to a charger, powerbank or even your laptop using the included USB cable. After about 4 hours it will be fully operational again!

Waterproof

Use the irrigator in the bathroom, shower or bath without worry. The device is distinguished by its IPX7 water resistance - it is not afraid of accidental splashes! The product is also equipped with double seals, which effectively prevent possible leaks. If necessary, you can also clean the irrigator to keep it in excellent condition even longer.

Lightweight and portable

The FairyWill 5020E irrigator is incredibly lightweight and portable. Thanks to its ergonomic design, it fits perfectly in your hand and provides comfort. If you want, you can easily take it with you on vacation - it won't take up too much space in your bag or suitcase. Nor will it be a heavy burden.
