The ENCHEN brand is part of the Xiaomi ecosystem.

ENCHEN Boost-W Set Hair Clipper

You don't have to spend money in a hair salon anymore - now you can accurately trim your hair in your own home! The ENCHEN hair clipper is equipped with high-quality blades, the length of which you can adjust from 3-21 mm with a sliding comb attachment. The 600mAh rechargeable battery ensures long working time, and the included accessories such as scissors and a hairdresser's cape will make it easier for you to create perfectly polished hairstyles.

Adjustable blade length

Say goodbye to the need for many different comb attachments for your razor. The ENCHEN brand device is equipped with a specially designed sliding cap that allows 7-step blade length adjustment in the range of 3 / 6 / 9 / 12 / 15 / 18 / 21 mm. This makes it ideal for trimming children's hair, styling sideburns or creating a variety of hairstyles, among other things. However, this is not the end of the possibilities! After removing the cap, you can shorten the hair to a length of 0.7 mm.

Long working time - convenient charging

Free yourself from cables and get more freedom of movement when cutting hair. ENCHEN hair clipper can work wirelessly - it has a built-in 600mAh battery. Fully charged, it can serve you for up to 3 months! The included USB-C cable allows you to conveniently charge the device with a charger, powerbank or even a laptop. After about 1-1.5 hours, the razor will be ready to work again! The product is also equipped with intelligent charging protection.

Precision and safety

Find out that a precise haircut can take less time! The razor is equipped with a high-quality ceramic cutting head, which allows you to cut hair quickly and effectively without pulling or causing irritation. What's more, thanks to the rounded blades, you don't have to worry about cutting yourself. All this makes the device ideal for both adults and children!

Reliable operation - 2 speeds to choose from

A modern motor is responsible for the efficient operation of the razor. You can also choose from 2 speeds to adjust its operation even better to your needs. In most cases, the Normal mode (4500rpm) will work perfectly, and for particularly thick hair the Turbo mode (5800rpm) will be suitable. At the same time, the device works extremely quietly - its volume level is only about 55dB.

Even more conveniences

Cutting hair has never been so easy and convenient. The ENCHEN Boost hair clipper is extremely user-friendly and fits perfectly in the hand, providing unparalleled comfort. Lightweight and handy - you will successfully use it not only at home, but also, for example, on vacation. It will not take up much space in your suitcase! You can also easily remove the head of the device and wash it under running water. This will avoid the multiplication of bacteria and reduce the risk of skin problems.

Practical accessories included

In the package, you will also find several practical accessories that will make it easier for you to cut your hair at home. Scissors will allow you to create the hairstyle of your dreams, and a special cape will ensure that tiny, scratchy hairs do not get under your clothes. Blade oil and a cleaning brush will come in handy for maintaining the device. The included accessories will make you feel like in a hair salon in your own home!
