

Carpet washing vacuum cleaner Deerma DEM-BY200

Ref: 6955578040832

Carpet washing vacuum cleaner Deerma DEM-BY200

Carpet washing vacuum cleaner Deerma DEM-BY200

Make cleaning your carpets, upholstery and more easy. The Deerma DEM-BY200 laundry vacuum cleaner will remove even the most stubborn stains in no time, using hot water at about 50°C. The device also allows quick drying and is IPX4 waterproof. It also offers 2 cleaning modes and is very convenient to use. Interchangeable brushes are also available, with which you can easily clean your carpet, get rid of stains from your couch, and even clean a window.

2 cleaning modes

Say goodbye to stubborn stains - with the Deerma vacuum cleaner you can easily get rid of them. The device offers 2 cleaning modes to choose from. Working in the first of them, it uses water at room temperature. This is ideal for everyday use - it will remove smaller dirt, protecting materials from damage and not causing color fading. The second mode provides water at a temperature of about 50°C - the built-in PTC heater is responsible for its automatic heating. Such a solution will be great for cleaning carpets and will make it easier to remove difficult stains.

As many as 5 brushes included

Take care of tidiness around the house. Special brushes will help you do it! The standard brush with bristles allows you to spray materials with water and quickly remove dirt. A large brush with a width of 16 cm will allow you to clean larger surfaces in less time. It will work

well for carpets, for example. A glass washer will make it easier for you to clean windows or mirrors, and a small brush with soft bristles will be suitable for cleaning shoes, for example. There is also a brush with a rounded head, so you can easily remove dirt from plushies and more.

Your way to dirt

Spilled coffee or juice is no longer a problem - cleaning has never been easier! The brush of the vacuum cleaner not only sprays fabrics with water under pressure (about 1 bar), but also allows you to remove dirt from deeper layers of materials. As a result, it perfectly handles even the most stubborn dirt! The DEM-BY200 also enables fast drying. It instantly extracts water with dirt, so the material remains perfectly clean and dry.

2 water tanks

Don't worry about dirt getting back on your just-cleaned carpet or chair. The DEM-BY200 vacuum cleaner is equipped with 2 tanks - for clean and dirty water. The first has a capacity of 1.6 liters, and the second 1.4 liters. Both are very airtight and large enough that you don't have to refill or empty them too often. You can also add some cleaning agent to the clean water tank for even better results.

Comfortable cleaning

Ensure maximum comfort while cleaning. The vacuum cleaner is very simple and convenient to use. It also allows you to automatically clean the brush - you don't have to do it manually! Its movement will also not cause you any problems. Also noteworthy is the long 5-meter cable - to retract it, just press a button. What's more, special handles will make it easy for you to store the brushes, and the 1.5-meter hose will ensure freedom of movement.
