

Third-Person Backpack Mount Insta 360

Third-Person Backpack Mount Insta 360

Ref: 6970357853625

Third-Person Backpack Mount

Create original video footage from a third person perspective. This practical mount allows you to attach your Insta360 camera to your backpack and record unique shots from behind your back. Free your hands and get stunning results effortlessly! The accessory is designed to reduce shocks as much as possible - so you can easily prepare a smooth, stable video.

Unique third-person perspective shots

Shooting alone? Want to create an original third-person perspective video? Or would you like to create a drone-like shot? With the mount you can easily achieve the desired effects! Finished videos can be edited using the dedicated app. Scooter riding, climbing, snowboarding tricks or maybe kayaking? Capture your adventures from an unusual perspective!

Refined in every detail

Forget about unwanted shocks and vibrations. Thanks to the thoughtful design of the grip and the FlowState stabilisation technology that Insta360 cameras support, you can record even the most dynamic shots without worry. At the same time, the accessory is very easy to install, lightweight, robust and comfortable to use. It is also equipped with adjustable straps that allow it to be easily attached to most backpacks.
