Yi Home Camera Y623 indoor rotating IP camera

Ref: 6970171177389

Yi Home Camera Y623 indoor rotating IP camera

 Yi Home Camera Y623 indoor rotating IP camera
Enhance your security with the Yi Y623. The indoor camera records around the clock in 1080p HD for clear, detailed images. What's more, it detects loud noises and instantly sends a notification in the Yi Home app. It also works with Amazon Alexa, so you can control it with simple voice commands.

High quality video
Control what's happening in your home when you're not there. The camera is equipped with a 115° wide-angle lens, so it can cover a larger room at an optimal angle. In addition, a high frame rate of 20 frames per second and H.264 video compression translates into HD-quality images.

Intelligent motion and audio detection
The Yi Y623 detects people moving within the camera's range and can distinguish them from other objects, such as flying insects or pets. In addition, it picks up unusual loud sounds within a range of about 5 meters, and then sends a notification in the app. YI Home is available on Google Play (https://play.google.com/store/apps/details?id=com.ants360.yicamera.international&hl=en) or App Store (https://apps.apple.com/us/app/yi-home/id1011626777). To stay up to date, you'll need a microSD card or a subscription to the selected Kami cloud plan.

Save recordings to the cloud
Yi provides access to the Kami cloud, allowing you to preview your footage. In addition, you can store your saved recordings for 30 days. When you choose the right package, you gain the ability to connect 5 cameras to one plan and many other interesting options. In addition, the cloud sends automated AI alerts.

For the sake of your safety
YI, through collaboration with Noonlight, have designed a trusted, reliable and secure home security system linked to a 24/7 emergency response system. Now you have the convenience of one-touch emergency services. You also don't have to worry about false alarms.
