

## Rojeco 2 In 1 Interactive Cat Toys

Rojeco 2 In 1 Interactive Cat Toys

Ref: 6975116293490

### Rojeco 2-in-1 interactive cat toy

Give your cat a chance to have fun that develops. The 2-in-1 interactive toy supports up to five modes, offers colorful backlighting and comes with feathers and balls that are sure to attract your pet's full attention, spark curiosity and keep him entertained. The device automatically turns on and off after a certain time. You can power it in two ways, and its operation is facilitated by a practical button.

### Two ways to have great fun

Make sure your cat can have great fun while you're away, too. Rojeco's interactive toy is equipped with three types of feathers in different colors that unexpectedly pop out of six holes, encouraging your pet to hunt. To provide maximum entertainment for the pet, two balls that rotate 360° have also been provided. This allows four-legged companions not only to develop their instincts, but also to move more. Take care of your furry friend's well-being with Rojeco!

### Five modes of operation

By opting for the Rojeco toy, you can be sure that your cat will always have access to an unlimited source of entertainment. The device offers up to five modes of operation. In Fast mode, the feather moves quickly and a green light is activated. Medium Speed mode offers a blue light, and the pen moves at medium speed. Another mode, Smart Mode 1, provides different colors of light, and the speed at which the pen moves varies between medium and fast. Smart Mode 2, on the other hand, is a mode in which the light is turned off, and the

feather changes speed completely as in Smart Mode 1. The last mode is Feather Changing, in which the red light flashes. Using this mode, you can freely change the pen.

#### Easy replacement of feathers

Installing the feathers will not cause you any difficulties. To do so, you just need to start the dedicated Feather Changing mode, and then screw in the accessory by turning it clockwise. Feather removal is done by spinning counterclockwise.

#### Automatic operation

In Fast and Medium Speed modes, the toy automatically turns off after 10 minutes of operation and then turns on by itself every 4 hours. This allows you to spend the day out of the house without interruption, knowing that your cat is having a great time. On the other hand, when operating in Smart Mode 1 and Smart Mode 2, the device not only automatically shuts off after 10 minutes and restarts every 4 hours, but also recognizes the night time during which it remains idle so as not to disturb your household's sleep.

#### Two ways to power it

Power the Rojeco interactive toy as you are comfortable. You can purchase 4 AA batteries or connect it to a power source using a cable. You decide!
