Case B&W type 3000 for DJI Air 3 (orange)

Ref: 4031541755957

B&W Type 3000 DJI Air 3 Drone Case (Orange)

The B&W Type 3000 drone case is designed to provide safety for your DJI Air 3 drone and its accessories. The product is made from durable PP material, ensuring reliable protection against mechanical damage. Numerous certifications confirm its high-quality construction. The accessory also boasts an IP67 water resistance rating and is suitable for air travel. Innovative latches provide convenient access to its contents, and two padlock holes (Ø 7.0 mm) eliminate the risk of unauthorized access.

Comprehensive Protection for Your Drone

Ensure the safety of your drone with the B&W case, which allows for convenient storage and transportation. You can be confident that your DJI Air 3 will reach its destination undamaged, regardless of the conditions. The accessory protects the device from snow, hail, rain, and even extreme temperatures ranging from -30°C to +80°C. It is also impact-resistant, ensuring your drone remains unharmed in the event of a fall. The product's durability is confirmed by certifications such as MIL-STD-810, STANAG 4280, DEF STAN 81-41, and ATA 300.

An Essential for Travel

If you are planning to travel by plane and want to capture breathtaking aerial views with your DJI Air 3, be sure to bring the B&W case with you. Thanks to the precisely fitted foam insert, the drone is optimally protected from shocks during the journey. The automatic pressure compensation valve allows for convenient air transport. Inside the case, there is a pocket for documents, and a practical name

label facilitates identification. The product's weight does not exceed 2.1 kg, and its dimensions are 365 x 295 x 170 mm. The rubber handle makes it easy to carry.

Impressive Capacity

The case has a capacity of up to 11.7 liters. This allows you to comfortably accommodate not only the DJI Air 3 but also essential equipment, including ND filter sets and wide-angle lenses. The special foam insert also allows for the transport of up to 4 additional batteries (one of which must be placed in the drone). The product is also compatible with DJI RC-N2 and DJI RC2.
