Lens filter set ND 8/16/32 Telesin for GoPro Hero 9 / Hero 1 Lens filter set ND 8/16/32 Telesin for GoPro Hero 9 / Hero 10 / Hero 11 (GP-FLT-902)

Telelesin GP-FLT-902 ND filter set for GoPro Hero 9 / Hero 10 / Hero 11 / Hero 12

The Telesin ND filter set will allow you to take even more beautiful shots with your GoPro camera. The magnetic mount makes it easy to install, and the aluminum frame, silicone pad, and 9H hardness glass ensure its durability. Accessories weigh only 8 g - so they will not weigh down your camera.

Create stunning shots

ND filters are great for recording sporting events - they produce the motion blur which allows for a one-of-a-kind display of speed. They are also suitable for long exposure shots. So you can use them for shooting for instance the night sky.

Multi-layer coating for enhanced protection

The filter lens has been coated with a multi-layer coating that makes it waterproof and anti-fouling. It also helps to reduce the mirror effect. This useful accessory will surprise you with its functionality and reliability.

Incredibly resistant to damage

You don't have to worry about accidentally scratching the glass either. The 9H hardness level means that it is extremely resistant to damage. It has also passed a number of demanding durability tests. The Telesin ND filter will serve you perfectly for many years.

Lightweight and durable frame

The frame, made of aluminum alloy and ABS plastic, is very durable, as well as resistant to corrosion and wear. Modern technologies used in the production process mean that you do not have to worry about it fading after some time of use.

Fast and hassle-free installation

Mounting the filter is fabulously easy and does not require removing the original lens. This is made possible by a special magnetic mount. In no time you will mount the filter on your camera and take a spectacular shot!

Packing list
