Car Magnetic Wireless Charger Mcdodo CH-2130 with Cooling Fan (clear)

Car Magnetic Wireless Charger Mcdodo CH-2130 with Cooling Fan (clear)

Conveniently use navigation and charge your phone while traveling without worrying about it overheating. The Mcdodo CH-2130 in-car inductive charger offers a power output of up to 15W and is equipped with a special cooling system that can maintain your smartphone's temperature at an appropriate level. The product is very user-friendly and is compatible with the MagSafe standard. You can mount it in two ways - on the air vent grille or the dashboard.

### Efficient and Convenient Charging

The charger is compatible with the MagSafe standard, which means it allows for efficient and safe charging of iPhones. It is equipped with high-quality magnets with strong magnetic force, ensuring the necessary stability for your smartphone - even during bumpy rides. Moreover, with a power output of up to 15W, you can charge your phone in surprisingly little time. No need to worry about your iPhone disobeying you at the most inconvenient moment!

### Advanced Cooling System

Does your iPhone often overheat during charging? Mcdodo has a solution for that! The CH-2130 charger features advanced cooling technology that can reduce your phone's temperature in a surprisingly short time. The built-in fan with 7 blades increases air flow by up to 300%, providing better heat dissipation, and the specially designed radiator offers exceptional performance. Now you can use

navigation and charge your smartphone without worries!

#### Well-Thought-Out Design

The charger is equipped with a ball joint that allows you to rotate your smartphone placed on it 360°. You can position it horizontally or vertically as you wish. The CH-2130 model is also protected against overvoltage, short-circuits, and overcurrent, enabling not only fast but also safe charging.
