Petoneer NutriSpin Intelligent Food Dispenser

Create a balanced eating plan for your pet and provide delicious meals at specific times of the day. The Petoneer NutriSpin smart food dispenser consists of 6 compartments where you can place both crisps and wet food for your pet. The easy-to-read TFT display makes it easy to operate the device, which you can also control remotely via an app. The product is safe for pets, and thanks to the modular design you can easily clean it.

Plan a balanced diet for your pet

You certainly like your meals to be varied. So why not provide similar variety for your pet? Place dry and wet food in the compartments of the NutriSpin rotary dispenser to ensure your pet has access to tasty, healthy food. This is a great way to plan a balanced diet for him. Your pet is sure to be delighted! Each compartment can hold up to 120g of food.

Easy to use device

The device is equipped with an easy-to-read TFT screen, which displays feeding times, for example. The touch buttons located underneath it allow you, among other things, to quickly unlock the dispenser. You don't have to worry that your pet will accidentally start

the NutriSpin and give himself an oversized portion. Operating the buttons is simple for humans, but impossible for pets!

Create varied feeding plans or give your pet an extra treat

The dispenser allows you to plan up to 5 servings per day. Want more? Pair it with the Petoneer app, which allows you to schedule up to 6 meals for 3 days! Your pets will automatically receive food at set times. When the dispenser turns, it will beep. You can also give your pet an extra serving of food yourself. Just press the appropriate button or use the app.

Pet-friendly

Don't worry about the health and safety of your four-legged friends. When the NutriSpin rotates, it effectively detects your pets claws. So if your cat or dog gets their paw close to it, the device will immediately stop to protect them from injury. What's more, the dispenser's sturdy, leak-proof design will not only keep food fresh, but also effectively stop your pet from sneaking treats outside of feeding hours.

Emergency power supply capability

The dispenser can be powered in 2 ways. For everyday use, it is best to plug it in using a USB-C cable. There is also an option to put 4 LR14 batteries in it, which will provide an emergency power source in case of a power outage. This will ensure that your pet always gets their meal on time. Note: batteries are not included and must be purchased separately.

Designed specifically for you and your pets

The Petoneer NutriSpin is made of durable ABS plastic. It also features a modular design. This makes its cleaning incredibly easy. What's more, special anti-slip pads prevent the dispenser from moving uncontrollably and provide it with stability. So your pet can comfortably eat the treats you prepare for him.
