

Shadeless tent Puluz 80cm LED 8500 lumens

Shadeless tent Puluz 80cm LED 8500 lumens

Ref: 5907489601252

80cm LED shadowless tent 8500 lumens Puluz

Experience how simple and fast it is to take perfect photos of objects. The Puluz lighting tent is used to create high-quality, shadow-free photos of a variety of objects. The entire kit is ready to go right out of the box and takes just a few minutes to assemble. It is handy, so we can use it both outdoors and at home or in the office. The product will meet the expectations of even the most demanding users. You do not need any additional accessories to create the shots - all you need is your camera or smartphone.

Many benefits

The shadow-free tent features a handy design when folded up, so storing it is not a major problem. Assembly of the tent is simple and takes very little time. The tent has no stroboscopic effect, has a high brightness and distributes heat very well.

Versatility

The tent has an opening top cover, so that you can also take photos from above. You will also find photographic backgrounds in different colours in the kit, so you can easily adapt the colour scheme to your specific product.

LED lighting

The built-in LED panels provide the perfect illumination for the tent. The lamps also have the ability to change position, so we can adjust

the direction of the light ourselves. This means you don't need any additional lamps - everything you need is included!

Easy assembly

The simple and compact design allows the tent to be set up in just a few minutes. The included carrying case makes transporting the tent easy and also protects it from dirt or damage.
