Puluz Shadowless Tent 30cm LED (PU5030)

Experience how simple and fast it is to take perfect photos of objects. The Puluz lighting tent is used to create high-quality, shadow-free photos of a variety of objects. The whole kit is ready to go right out of the box and takes just a few minutes to assemble. It is handy, so we can use it both outdoors and at home or in the office. The product will meet the expectations of even the most demanding users. You do not need any additional accessories to create your shots - all you need is your camera or smartphone.

Many benefits

The shadow-free tent features a handy design when folded up, so storage is not a major problem. Assembly of the tent is simple and takes very little time. The tent has no strobe effect, has a high brightness and distributes heat very well.

Versatility

The tent has an opening top cover, so that you can also take photos from above. You will also find photographic backgrounds in different colours in the kit, so you can easily adapt them to your product composition.

LED lighting

The built-in LED panels provide the perfect illumination for the tent. The lamps also have the option to colour the light or change the

position, so you can adjust the direction of the light yourself. This means you don't need any additional lamps - everything you need is included!

Easy assembly

The simple and compact design allows the tent to be set up in just a few minutes. The included carrying case makes transporting the tent easy and also protects it from dirt or damage.
