

## Condenser microphone Puluz PU612B Studio Broadcast

Ref: 5905316147423

Condenser microphone Puluz PU612B Studio Broadcast

Puluz PU612B Studio Broadcast condenser microphone

Record podcasts, live broadcasts, have conversations with loved ones and other players with the Puluz PU612B Studio Broadcast. The microphone captures clear sound without distortion and eliminates ambient noise. You can also adjust its position. The product is compatible with Android and iOS, so you can successfully connect it to various types of devices. The kit also includes additional accessories.

Clear sound without distortion

The microphone is cardioid, which means it picks up sounds in a specific field - straight ahead and to the sides. It provides clear high notes and emphasized bass. What's more, the DSP chip reduces ambient noise, so you can enjoy high-quality recordings without unnecessary noise. In addition, the low signal-to-noise ratio (78 dB) eliminates distortion during recording, and the foam shield and pop filter further suppress ambient noise.

Wide compatibility and convenient connection

Don't worry about compatibility issues. The Puluz condenser microphone is compatible with Android and iOS, so you can successfully connect it to such devices as smartphone, tablet, laptop, etc. What's more, it supports TikTok, Amazon Live, Facebook, YouTube and many other platforms. So you can record as you are comfortable. And plug & play makes it easy to connect the microphone to the device

- you'll find a USB sound card and XLR cable included.

#### Adjustability

Adjust the position of the microphone to suit your needs. You'll find a tripod included, which you can easily attach to a surface of your choice up to 15 cm thick. You can adjust its angle within 360°. In addition, the pop filter (360°) and microphone mount (270°) are also adjustable. Enjoy the freedom of use with the Puluz PU612B Studio Broadcast.
