Docking with clone function Orico Dual Bay USB3.0 HDD

Ref: 6936761869393

Docking with clone function Orico Dual Bay USB3.0 HDD

Orico Dual Bay USB3.0 HDD Docking with clone function

Take care of your data in a functional and secure way. The Orico 6629US3 HDD Docking Station with plug and play driver allows you to place both 2.5/3.5 inch HDDs as well as SSDs with SATA interface. The use of the standalone clone function securely, with the push of a button, allows you to duplicate all your data even if your computer is damaged.

Compatible with many devices and systems

Reading information from any device and system is a very important feature of the docking station. That's why the 6228US3-C supports almost all systems, including Windows/Linux/Mac and can be connected to multiple devices, such as PC, smart TV, PS4 and etc.

Excellent performance

With years of experience in storage device design and the use of modern technologies, with the Orico Docking Station you can safely manage your data. The docking station can support a single drive of up to 10TB capacity, and the implemented system of overload and other threats detection allows you to keep your data safe. The vertical heat dissipation is responsible for keeping the device at the right temperature so that it does not overheat and runs smoothly.

Practical design

The operation of the station is very clear. The blue light illuminates when the device is connected to the power supply and the LEDs start flashing when reading data. The non-slip feet of thick, high-quality silicone provide stability and offer excellent protection against drops.
