

## Filter ND64/PL PolarPro QuartzLine for 82mm lenses

Ref: 817465021521

Filter ND64/PL PolarPro QuartzLine for 82mm lenses

PolarPro Quartz Line ND64/PL filter for 82mm lenses.

Discover new possibilities for photography and filmmaking with PolarPro! The ND64/PL filter combines ND64 light reduction with PL polarizing effect, providing ideal conditions for creating professional shots even in the most demanding lighting conditions. It is especially useful when shooting on partly sunny days, when creating long exposure effects in motion, and when shooting water landscapes where glare reduction is crucial. They also feature exceptional scratch resistance, as well as water and oil resistance.

Your key to professional results

The ND64/PL filter is a combination of ND (Neutral Density) and polarizing (PL) filters, making it a versatile tool for any photographer. Its main task is to reduce the amount of light entering the lens, allowing you to increase the exposure time, while maintaining natural colors and contrast. In addition, the filter's polarizing effect helps reduce glare and reflections on reflective surfaces, such as water or glass, resulting in greater depth and detail in the image.
