

Darkflash Water Square 5 computer case (black)

Darkflash Water Square 5 computer case (black)

Ref: 6926170078998

Darkflash Water Square 5 computer case

Create the computer of your dreams. The Darkflash Water Square case features a thoughtful, modern design and allows you to achieve a stylish, gaming effect. It is extremely robust and resistant to damage. You can install up to 8 fans in the case. Among other things, it is equipped with USB ports and a power button.

Stunning design

The chassis looks really great. Its front panel attracts attention with an interesting honeycomb pattern. It is transparent, which allows achieving fantastic effects with the use of RGB accessories. Both the front and side panel is made of durable tempered glass with a thickness of 4mm.

Highest quality craftsmanship

The remaining parts of the case are made of high quality SPCC, which has been additionally painted. Thanks to this, the product looks even better. Moreover, the top panel features a magnetic design. It is designed to reduce the risk of dust getting inside the case and to make it easier for you to clean.

Create the ultimate cooling system

Don't worry that your computer will overheat. The product accommodates up to 8 fans (available separately) and is equipped with an internal cooling channel. You have the possibility to install a 240mm water cooling system or 2 120mm fans in the top case. At the front, you can place a 360mm water cooling pad or 3 x 120mm fans. At the back of the case, the case provides space for one 120mm fan. Above the power supply, the case provides space for 2 fans for more effective cooling and an interesting RGB effect.

User-friendly

The case is designed to allow you to build and expand your computer with relative ease. Among other things, Water Square 5 can fit 2 SATA 2.5 drives (HDD or SSD), a 340mm VGA and a 165mm CPU cooler. A space for a power supply can be found at the bottom of the case.

Built-in ports and buttons

Enjoy simple and convenient computer operation. The case is equipped with 2 USB 2.0 ports and one USB 3.0 port that will allow you to transfer files quickly. The product also has a built-in power button and ports to connect a microphone and headphones. Moreover, one of the ports supports RGB lighting effects control mode.
