IP FloodLight Camera Laxihub F1-TY WiFi 1080P Tuya

IP FloodLight Camera Laxihub F1-TY WiFi 1080P Tuya
Ensure the security of your home with the Laxihub brand. The Laxihub F1-TY outdoor IP camera records in Full HD 1080 p resolution for crystal clear images. The 135° wide angle lens further enhances the field of view. The Laxihub F1-TY provides good visibility (up to 10 m at night) and clear two-way audio. An added bonus is motion detection supported by artificial intelligence. When the camera detects motion, it will send a notification to your phone.

2100 lumens for perfect brightness
The Laxihub F1-TY outdoor IP camera is equipped with a Tuya LED light that provides incredible brightness. The Laxihub camera delivers as much as 2100 lumens to accurately illuminate your driveway, front door or the area around your garage. This will help ease your way into your home, but it will also deter a possible intruder. The camera is compatible with Amazon Alexa and Google Assistant.

Control the lighting your way
The light in the Laxihub F1-TY camera has been linked to motion, so the F1-TY will light up when the infrared sensor detects motion. The camera will then record video - video duration is from 60 to up to 180 seconds. The light can also be controlled manually thanks to the app, where it is possible to prepare a schedule.

Two-way audio and easy communication

With Laxihub F1-TY, you can communicate with your guests and household members. Not only will you see them in the app, but you will also relay important information to each other. The F1-TY uses a built-in, ultra-responsive microphone and noise-canceling speaker that lets you talk anywhere, anytime. For example, you can ask the delivery person to leave a package at your door.

Waterproof and durable

The Laxihub F1-TY outdoor IP camera will work well all year round as it is weatherproof. The IP65 waterproof design ensures safe and accurate recording regardless of snow or rain.

Tuya Smart and Arenti

The Laxihub F1-TY outdoor IP camera works with the Arenti app. It is also compatible with the Tuya Smart app, which provides maximum capabilities and allows you to conveniently sync thousands of devices from different manufacturers. Through the app, you can monitor the situation with your family members - just encourage them to download it and share access to the camera. Importantly, you can cancel it at any time.

Free cloud storage

The Laxihub F1-TY outdoor IP camera supports FAT32 Micro SD cards (sold separately) with capacities from 8 GB to 128 GB. Videos can be exported from the SD card in MP4 format. Importantly, there is 3 months of free cloud storage - when the camera detects motion or sound, it will save video to the cloud for 72 hours (if the cloud storage service is enabled).

Alarm for improved security

If you suspect that there is an uninvited guest under your house, you can activate the siren. When motion is detected, the application will send a message with the possibility of activating the 120 dB alarm.

Operating temperature
-20 °C to 50 °C
AC power supply
100V~240V
