

Door and window sensor PGST PB-68

Door and window sensor PGST PB-68

Ref: 5907489606844

Door and window sensor PGST PB-68

The product from PGST is a multi-functional device that serves as a security button and door sensor. PB-68 consumes very little energy and is very easy to install.

How it works

The sensor has a magnetic strip that detects intrusion. When the relay is away from the magnetic strip, then the alarm will sound. You will use the PGST brand product not only at home, but also at the store, warehouse, bank, company, etc.
