Hair Dryer ENCHEN AIR 2 Plus

Ref: 6974728534069

ENCHEN AIR 2 Plus Hair Dryer

Tired of electrifying hair and all you dream of is a shiny hairstyle without frizz? You can achieve it with the ENCHEN AIR 2 Plus hair dryer. The product is distinguished by its powerful motor and allows you to quickly dry your hair with hot or cool air, without generating too much noise. What's more, it maintains a constant temperature and ionizes the air, so at the end you get the effect of soft, smooth hair without using additional cosmetics! The foldable design will allow you to conveniently store the dryer or take it with you on almost any trip.

Hair like after leaving the salon

Now your hair can look like it has just been styled by a stylist! ENCHEN AIR 2 Plus ionizes the air as it dries, allowing millions of negative ions to settle on the surface of the hair, making it moisturized, smoother and more manageable. The negative ions neutralize the effect of the positive ones, so hair stops electrifying and can finally look perfect in any situation.

Instant hair drying

What makes the ENCHEN AIR 2 Plus so efficient? The dryer is equipped with a powerful 1,800-watt motor that delivers powerful blasts capable of drying your hair in an extremely short time. In addition, the dryer nozzle rotates 360°, making it easier for you to reach every strand. It only takes about 5-10 minutes to dry your long hair and get the effect of a healthy and moisturized hairstyle all the way to the

ends! At the end of styling, use the Cool Shot button - the cold air will make your hair shine even more!

Dry, but not overdried

ENCHEN AIR 2 Plus hair dryer will make it easier for you to take care of your hair every day and take care of its perfect condition! How is it possible? An intelligent system keeps the temperature at a constant level, and if the temperature rises above the expected level, the device will automatically turn off. Such a solution prevents the dryer from overheating, and, most importantly, guarantees that too high a temperature will not dry out your hair.

Additional amenities

It is worth noting a few details that make ENCHEN AIR 2 Plus so convenient to use. The specially designed air intake avoids hair entanglement, and thanks to the folding design, transporting and storing the dryer won't cause you the slightest problem. The dryer is really lightweight (450 g) and is equipped with a 1.8-meter cable, which will guarantee you full comfort while drying. In addition, the use of high-quality materials makes the dryer safe to use, and the risk of burns is practically non-existent.
