

PolarPro Recon VND Matte Box System - Base Kit

PolarPro Recon VND Matte Box System - Base Kit

Ref: 817465028094

PolarPro Recon Base Kit VND Matte Box System - base kit.

Create even better shots. In the kit you'll find an improved VND3-6.+ filter that perfectly reduces light even in extremely bright environments. It is made of high-quality materials, which guarantees its durability. A special aerodynamic hood will help reduce air resistance when shooting on car tracks or in airports. Assembling the individual components will not cause you any problem, and the Defender covers will provide effective protection for the Recon system. The kit also comes with a practical case for easy storage and transportation.

Carefully thought-out design

The specially designed design of the Recon VND Matte Box System provides incredible comfort during use. It also guarantees speed and versatility, which is especially important when filming in different lighting conditions. What's more, the handy hood and flag will allow you to easily transform the Recon into a practical, yet compact Matte Box System. The use of a quick-release lever will allow you to instantly expand or retract the hood.

Even more possibilities

The kit allows for as many as 6 powerful configurations for unparalleled versatility. You can easily combine individual components to create unique configurations, such as a threaded base and hood/flag or VND 3-6+ filter and Stage 2 filters (sold separately). What's

more, both assembly and disassembly and configuration is extremely fast and is done without any tools.

Included
