Solar lamp Superfire FF7-B, 28W, 2400mAH

Ref: 6956362971509

Superfire FF7-B solar lamp

SuperFire FF7-B is a solar lamp that will accurately illuminate any place you choose to place it. It is suitable for both home and street use. The omni-directional and wide-angle spacing of the LEDs provides comfortable illumination even on the darkest night, and the easy mounting allows you to hang it on almost any wall.

Turns on when you're close

The FF7-B has an extremely sensitive motion detector, which you can use in three ways. In the first mode, the lamp turns on when it detects motion and completely turns off after 20 seconds when you move away from the sensor field. In the second mode, the lamp turns on when motion is detected and gently dims the light after 20 seconds, while the third mode is the opposite - the gentle light amplifies when the sensor detects motion.

An eco-friendly shot in the arm

The environmentally friendly and energy-efficient SuperFire lights generate exactly zero electricity charges annually. Thanks to a solar panel made of polysilicon, the FF7-B charges during the day, converting the sun's rays into electricity, and you enjoy fee-free lighting!

Control with minimal effort

Another advantage of the lamp is that you don't have to operate it manually, as it automatically turns on when it gets dark around you and turns off when it gets light. In addition, it has an easy-to-use remote control, with which you can turn the light on or off at a convenient moment, set the mode of operation you are interested in, and also activate the SOS signal if necessary.

Durability for years

Noteworthy is the longevity that the lamp has. Extremely powerful and efficient LEDs provide bright illumination with low power consumption, so it will serve for many years where you need it. The FF7-B housing is made of high-density ABS plastic. It protects the lamp from falls, makes it resistant to water (IP54) and temperature (-10~45°C), so it can successfully shine in any weather conditions, which will not affect its wear level.

Brand

Superfire

Model

FF7-B

Battery capacity

2400mAh (v.2 18650)

Power

28W (0.2 W * 144 PCS)

Voltage

DC 3.7V

Operating time

6-20 hours

Waterproof rating

IP54

Solar panel power

3W/6V

Dimensions

130x380 mm

Weight:

415g

Color of light

cold white

Features

Lighting modes, remote control, motion detector

Price:

Before: € 16.0023

Now: € 15.50
