Water Cooling Darkflash DX360 V2.6 PC ARGB 3x 120x120 (white)

Darkflash DX360 V2.6 PC Water Cooling RGB 3x 120x120 (white)

Take care of keeping your computer's CPU temperature at the right level. The DX360 V2.6 water cooler is equipped with 3 120mm fans, and thanks to its enlarged copper base it dissipates heat efficiently. The device also works extremely quietly. It is also distinguished by colorful ARGB backlighting, which will allow you to achieve stunning visual effects. The product is compatible with Intel and AMD processors.

3 120mm fans

Three 120mm fans, each equipped with 9 blades and a high-quality Rifle bearing, are responsible for efficient CPU cooling. They are also distinguished by impressive performance and low noise level - only about 32dBA. This was made possible by the use of special anti-vibration pads. Forget about annoying noise! The fans also support PWM function, which makes them able to automatically adjust their speed according to the CPU temperature.

Optimal cooling

Play even extremely demanding games without worries - with DX360 V2.6 your computer won't get excessively hot! The copper cooling base ensures efficient heat dissipation, while ceramic bearings, a high-performance pump and durable tubes are responsible for greater efficiency and extended life of the device. You also don't have to worry about leaks. What's more, the heat sink was created from durable

aluminum, and thanks to its well-thought-out design, it guarantees optimal airflow.

Hassle-free installation

Installation of the cooler will not cause you any problem. The device is compatible with various models of Intel and AMD processors. It is also possible to synchronize it with the motherboard (3 pin 5V connector). You will also easily install fans. You also have a PWM hub with 3 ports - 1x PWM/FG and 2x PWM 3 pin or 4 pin. What's more, even if there is no corresponding port on the motherboard, you can still control the LED mode using the Reset button on the computer case.

Delightful design

Give your computer a modern touch. The DX360 cooling has been equipped with colorful ARGB backlighting that will give you original visual effects. A specially designed water block with LED backlighting is an added bonus. You can also rotate its head 360° to position the visible logo on it at the desired angle. Want to get even more interesting results? Combine the cooling with other RGB components!

In the box

Water cooling

Intel & AMD mounting kit

Set of screws

Thermal conductive paste

PWM connector

User Manual

Manufacturer

Darkflash

Model

DX360 V2.6

Cooling type

Water

Color

White

Dimensions of heatsink

394 x 120 x 27mm

Dimensions of water block

78.5 x 70 x 54mm

Pipe length

450mm

Rotational speed

2700RPM $\pm 10\%$

Maximum fan noise level

32dBA $\pm 10\%$

Rated voltage

12V

Starting voltage

Approx. 6V (power on/off)

Maximum rated current

0.35A

Maximum power consumption

4.20W

Number of fans

3

Fan dimensions

120 x 120 x 25mm

Fan speed

800-1800RPM

Airflow

51CFM \pm 10%

Illumination

Yes

Compatibility

Intel: LGA 115x / 1200 / 1700 / 20xx(v3);AMD: FM2(+) / AM2(+) / AM3(+) / AM4; AM5

TDP

295 W

Price:

€ 107.00
