USB 3.0 4-Port Hub with USB-C and USB 3.0 with Power Adapter Vention TGKBB 0.15m, Black

Ref: 6922794746732

Hub Vention 5-in-1 Black 15cm

The Vention 5-in-1 Hub TGKBB is a true gem among computer accessories. The use of USB3.0 interface ensures lightning-fast data transfer at a speed of 5Gbps, while guaranteeing smooth operation of connected accessories such as mice or keyboards. Additionally, the hub allows for simultaneous charging of two smartphones, which is a definite advantage for those who use multiple devices. The modern USB-C plug, in combination with a half-meter cable, offers versatile connectivity options, and the ability to support hard drives up to 8TB makes it an indispensable tool for those storing large amounts of data. All of this is enclosed in an elegant black housing that complements any hardware setup.

High-Speed Data Transfer

One of the advantages of the Vention TGKBB hub is its ability to transfer data at an incredible speed of 5Gbps. Thanks to the USB3.0 interface, this hub not only offers compatibility with various devices but also ensures lightning-fast file, music, or video transfers.

No Delays in Work

If you value smooth operation and work comfort, this hub is an excellent choice. When you connect your mouse, keyboard, or other accessories to it, you can be sure that you won't experience any delays. This ensures that your work will be more efficient and comfortable.

Charging Two Smartphones Simultaneously

Have you ever had to choose which of your devices to charge first? With this hub, you have the option to charge two smartphones simultaneously. Simply connect the hub to the charger, and then your devices – and enjoy the fact that both will charge at the same time.

Versatile USB-C Connector

The half-meter cable of the hub is equipped with a modern USB-C connector. This forward-looking solution not only provides better compatibility with new devices but also ensures that the hub will serve you for a long time due to its universality.

Support for Large Hard Drives

Planning to connect a large hard drive? This hub supports hard drives with a capacity of up to 8TB. This means that you can store and transfer large amounts of data without worrying about their safety.
