

360° Outdoor Wi-Fi Camera IMOU Cruiser SE 4MP

360° Outdoor Wi-Fi Camera IMOU Cruiser SE 4MP

Ref: 6971927231881

360° Outdoor Wi-Fi Camera IMOU Cruiser SE 4MP

IMOU Cruiser SE allows you to monitor the area in front of your house. What's more, it works wirelessly and connects to your smartphone via Wi-Fi. It records videos in 4MP QHD quality and offers several modes. It is IP66 water and dust resistant, so it can work in adverse weather conditions. It features tracking of detected objects and audio recording thanks to a built-in microphone.

3 operating modes

The camera lets you choose between several types of night mode, so you can customize the operation of the IMOU Cruiser to suit your needs. Turn on Smart Mode for a clear black-and-white image. A warning light will come on when an intruder is detected. Color Mode offers a colorful image thanks to built-in LEDs - it will also serve as a light in front of the house. Infrared Mode, on the other hand, uses infrared to provide a clear black-and-white image after dark.

High quality recordings and 2 ways to save

With the IMOU Cruiser SE, you can be sure that all important events will be recorded. The camera offers 4 MP recording, which translates into clear and clean images. The finished footage is saved on a micro SD card with a capacity of max. 256 GB or in the IMOU cloud.

Object detection and wide angle of view

The camera detects and tracks moving objects and people, automatically sending a notification, and activating an alarm and warning light. The rotating head provides a viewing angle of up to 90° vertically and 355° horizontally. So you don't have to worry about blind spots.

Customized to your needs

You can personalize the camera's operation with the available settings. Enable a schedule to set alarms for the days of the week and times of your choice. It's also possible to disable certain zones, so the alarm won't sound in the selected area.

Thoughtful design

That's not the end of the camera's advantages. The IMOU Cruiser SE has a built-in microphone that accurately records your voice - it will be useful, for example, when picking up a package from a courier. What's more, the external dual antenna is responsible for stable signal transmission, and the water- and dust-resistant design translates into durability and longer product life.

Included

camera
installation instructions
power supply
mounting bracket
waterproof connector
screw set
mounting plate

Manufacturer

IMOU
