

Electric Clipper Glaker GL-K11S (Black)

Electric Clipper Glaker GL-K11S (Black)

Ref: 6973734203112

Electric clippers Glaker GL-K11S (black).

The Glaker GL-K11S set includes a reliable electric hair clipper that serves as a perfect companion for grooming your beard and hairstyle. Supported by a powerful rechargeable battery, it allows continuous operation for up to 5 impressive hours! In addition, the extremely low noise level oscillating around 60 dB guarantees peaceful use. Wireless operation is the key to achieving maximum convenience and precision. If necessary, a universal USB-A cable is always at hand, ready to recharge the device when the battery reaches the end of its power.

Freedom along with precision at a high level

The GL-K11S hair clipper works wirelessly, opening up a full range of movement when fine-tuning the details of your beard or hairstyle, with no unnecessary cables restricting your freedom. The extremely powerful battery allows for an impressive 300 minutes of use, and takes 3 hours to fully charge. This device is perfect as a partner for work, travel, vacation or everyday use at home.

Durability in a unique form

The razor is distinguished by its solid metal construction, which guarantees the device's long-lasting durability and makes it easy to clean. A subtle, minimalist finish adds a professional touch to the equipment. Blades made of corrosion-resistant stainless steel not only provide long-lasting performance, but also allow you to work with damp hair.

Rich set of accessories

This is not just a razor, but a comprehensive set of accessories for efficient and precise work. The set includes as many as 15 different attachments, allowing you to customize your hairstyle to your preferences. The attachments offer a range of cutting lengths from 1.5 to 5.1 mm, opening up a wide field of creativity for you. A bottle of oil is included to keep things going. Everything is packaged in a handy carrying case, which also includes an instruction manual, a hair removal brush, a USB cable and a cape to prevent hair from spreading and eliminate the uncomfortable stinging sensation when finished.

Smart LED Display

The razor features a practical LED display that provides vital information, including the current battery status. This allows you to strategically charge the device so it's always ready to go whenever you need it. The LED display indicates the percentage of remaining power. When the battery level drops below 5%, a red icon appears next to the percentage result. In addition, the razor tells you when it is necessary to add oil, in this case, the red icon also appears, and the device additionally signals this with an audible alarm.
