

Kids smartwatch Havit KW11 (Pink)

Kids smartwatch Havit KW11 (Pink)

Ref: 6939119056858

Havit KW11 Smartwatch for Kids (Pink).

Looking for a way to stay connected to your child while keeping them safe? Discover the Havit KW11 - a smartwatch for kids that offers not only premium 4G video connectivity, but also location monitoring via GPS, WiFi and LBS. But that's not all! Your child will be delighted with the 7 built-in mini-games, and you will appreciate the advanced security features, such as voice recording and rejecting unknown calls. Plus, you control everything from an intuitive smartphone app, and in emergency situations your child can always press the SOS button. Invest in peace of mind.

High-quality video calls

The Havit KW11 smartwatch offers 4G video calls in HD quality, which is the perfect tool for keeping kids and parents close, regardless of distance. Now your child can not only hear you, but also see you as you talk. This is a great option to always be "next to" your child when they need it.

The beginning of independence under control

Your child's safety is a priority. With LBS GPS and WiFi features, the Havit KW11 smartwatch allows you to monitor your child's location in real time. This is an invaluable feature for parents who want to know where their child is, but at the same time want to give them some space and independence.

Advanced safety features

With the little ones in mind, there is a voice recording function - now you can stay in touch with your offspring in real time. KW11 also offers the ability to ignore incoming calls from unknown numbers, which increases the level of security and allows you to control who can communicate with your child. In this way, parents can rest assured that their kids are protected from unwanted calls.

Comprehensive control from your smartphone

Control of all smartwatch functions is done via a dedicated app. This allows you to easily and quickly manage settings such as location monitoring or a list of trusted numbers. This way you are always up to date. From the app, you can also check your recording and activity history.

SOS function for maximum protection

In emergency situations, your child can quickly and easily contact you by holding down the SOS button. Activating the alarm automatically sends a message to the caregiver, further increasing your child's safety. This is not only a practical solution, but also a sense of peace of mind and reassurance for parents.

Ideal for active kids

Does your child love fun and adventure? The Havit KW11 smartwatch is more than just an ordinary watch. It offers 7 mini games to keep your child entertained in their free time. And what if the fun moves to the fresh air? No problem! With IP67 waterproof certification, the watch is resistant to rain and accidental splashes, so you don't have to worry about the device. It's the perfect choice for little explorers and their parents who value durability and functionality.

Thoughtful design

The Havit KW11 smartwatch is designed with everyday comfort and convenience in mind. With a screen size of 1.4 inches and a resolution of 240 × 240 pixels, it guarantees readability and sharpness of the image, which is extremely important during video calls. What's more, with a battery capacity of 680 mAh, your child will be able to use the watch all day long without frequent charging. For parents, it's an added convenience, and for kids - more time to play and explore the world.
