ORICO-M231C3-GY-BP HDD ENCLOSURE (Grey)

Conveniently use your hard drives and simplify your work. The ORICO M231C3-GY-BP external case allows for file transfer speeds of up to 6 Gbps and comes with a 2-in-1 USB cable (USB-C to USB-A / USB-C), making it easy to connect to your chosen device. The product stands out with its wide compatibility, and it is made of a durable aluminum alloy that efficiently dissipates heat. All of this contributes to efficient and reliable performance!

Impressive Performance

The external hard drive enclosure is the perfect solution for graphic designers, photographers, and anyone who works with multiple files and frequently transfers them between devices. The M231C3-GY-BP model allows for data transfer speeds of up to 6 Gbps, allowing you to transfer your photos or videos in the blink of an eye. With ORICO, you'll save valuable time! An advanced chip that supports the NVMe PCIe 3.0 protocol ensures efficient and stable operation.

Wide Compatibility

The product is compatible with M.2 SS 2280, 2260, 2242, and 2230 drives with a maximum capacity of 4 TB. You don't have to worry about running out of space for your files! In addition, the enclosure works perfectly with Windows, macOS, and Linux operating systems - no additional drivers need to be installed. You can also use it with projectors or game consoles without any issues. The product is easy to

install.

2-in-1 Cable Included

The package also includes a practical 2-in-1 cable. One of its connectors is equipped with an additional adapter, allowing it to function as both a USB-C to USB-C and a USB-C to USB-A cable. So, you don't need to use additional adapters! The cable also supports PD 60W output, ensuring incredible performance.

Enhanced Design

The case is made of aluminum alloy and features a thermal pad, ensuring excellent heat dissipation and protection against overheating. This translates to efficient operation. It also stands out for its high durability and resistance to damage. An integrated LED indicator provides information about its status. Furthermore, after 10 minutes of inactivity, the device automatically enters sleep mode, saving energy and extending the life of the enclosed drive.
