Smart socket Imou CE1P

Ref: 6971927232925

Smart socket Imou CE1P

Intelligent socket Imou CE1P

Imou CE1P is a smart outlet that you can plug any device into to make it energy efficient and safe. The socket has a button with which you can turn it on and off, but also pair it with your phone. The socket is of the European type - you can connect any device to it, such as lamps, Christmas tree lights, fan, humidifier, etc. With its help, you can set the hours and the period during which the device connected to the socket should be powered - this will help you not only take care of energy saving. Setting your devices on a timer while you're on vacation will help you maintain the illusion that you're still at home, which can discourage burglars from breaking into your home. An app for the outlet allows you to monitor in real time how much energy a connected device is consuming. The outlet is made of fire-resistant material to protect your safety.

Included:
Socket x 1
Instructions x 1
