Vention EACBG DVI (24+5) to VGA cable (1.5m, black)

The Vention DVI (24+5) to VGA cable provides unparalleled image conversion quality at 1080p FHD resolution, making every detail clearly visible. It features a ferrite magnet and double ferrite rings, which translates into excellent protection against interference. The product will prove reliable for gamers who want to connect graphics cards to a VGA monitor, as well as for those presenting their projects on large screens using a projector.

Richly detailed image

A crystal clear image at 1080p FHD resolution? With the Vention cable, it's possible! With it, you'll enjoy exceptional depth and rich detail. What's more, Plug&Play ensures an instant and hassle-free connection, eliminating the need for complicated setup.

A range of applications

The DVI (24+5) to VGA cable opens the door to a wide range of applications, meeting the needs of gamers and office workers alike. It allows you to connect graphics cards with DVI interface to a VGA monitor, providing higher quality and smoother images for a more immersive experience in the world of virtual entertainment. The product is also an indispensable presentation tool, allowing you to connect your laptop to a projector for impressive and professional shows on large screens.

Immune to interference

Thanks to the anti-static ferrite magnet and double ferrite rings, signal transmission is protected from interference and the image is always clear and stable. The cable's rugged construction combined with a durable and flexible PVC housing ensures resistance to wear and tear and mechanical damage, while guaranteeing long-lasting performance.
