Vention HCCBJ DisplayPort cable (5m, black)

The Vention DisplayPort cable with 8K resolution is designed for high refresh rates. It offers 8K Ultra HD resolution, HDR with wide color gamut and a bandwidth of 32.4 Gbps. It enables 3-mode display and provides excellent audio quality, resulting in a high level of immersion. At the same time, it is robust and immune to interference.

Achieve the immersion of your dreams

With 8K Ultra HD resolution, you'll experience incredible image sharpness, allowing you to immerse yourself in every detail and nuance of the scene. 3D effects bring an unparalleled spatial experience, bringing colors back to their natural beauty. You'll also enjoy smooth motion thanks to a high refresh rate of 240Hz (at 1080p) and G-sync and Free sync technologies that eliminate unwanted lag.

Perfect for gamers

Support for 32-bit audio channel will let you hear every sound detail and get an edge in gameplay. Whether you're playing PUBG at 2K@165Hz, CS:GO or Dota 2 at 4K@144/120Hz, the Vention cable provides stability and high quality so you can focus on your favorite entertainment. Immerse yourself in the action as you discover the fullness of sound and video!

3 display modes

Expand the capabilities of your equipment with the Vention cable. It allows you to display the image in 3 modes, making it versatile and suitable for a variety of applications. With support for Dual Screen Mirror, it is possible to display identical images on two monitors simultaneously. The Dual Screen Extend function, on the other hand, allows you to expand your workspace, which is invaluable for engineering, graphics or financial applications. For visualization professionals and multimedia enthusiasts, Multi Split-Screen with ATI Eyefinity technology enables advanced multi-screen configurations while offering 3D cinema-level image quality. It is worth noting that optimal performance requires a compatible graphics card with support for multiscreen.
