Vention HCDBH DisplayPort 1.4 HD 8K 2m Cable Black

In the era of technological progress, the right cable can work wonders for your audio-visual experience. We present the Vention HCDBH cable — a combination of innovation with reliability. It provides excellent image and sound quality, while also offering advanced features for a wide range of applications. Here's what makes it unique.

High Bandwidth for Excellent Image Quality

The Vention HCDBH cable features an impressive 32.4 Gbps of bandwidth, which translates to 8K@60Hz video transmission capability. In addition, it supports 4K@144Hz, 2K@165Hz and 1080P@240Hz resolutions. This makes it an excellent choice for those who appreciate crystal-clear images with no lag or distortion. Whether you plan to use it in a professional studio or for a home theater, this cable is sure to meet your expectations.

Versatility in Screen Sharing

One of the main advantages of the HCDBH cable is its support for various screen sharing modes. The user can choose modes such as: mirror mode, extend mode, or split-screen mode. This allows you to adjust the way content is displayed exactly as you need it — whether for presentations, gaming, or work.

Advanced Audio-Visual Support

The Vention HCDBH cable is not only about image quality but also sound. Support for dynamic HDR ensures better color representation and deeper contrasts, and 32-bit audio provides a clear and detailed sound. In addition, the cable supports G-sync & Free sync technologies, making it ideal for gamers who value smooth gameplay.

Thoughtful Design

The cable is made of durable PVC material, which ensures its durability for everyday use. The classic, black color allows for discreet integration into any interior. A length of 2 meters is a compromise between functionality and user comfort, regardless of where you decide to use it. By choosing the HCDBH model from Vention, you invest in quality and versatility.
