

Freewell DJI Mini 4 Pro UV Camera Lens Filter

Ref: 6972971864742

Freewell DJI Mini 4 Pro UV Camera Lens Filter

Freewell UV filter for DJI Mini 4 Pro drone

A filter designed specifically for the DJI Mini 4 Pro models. It is a high quality optical glass with special coatings to protect the lens from scratches, dust and dirt. The UV filter blocks ultraviolet light, so you will avoid haze in your photos and gain sharp, clear images. You'll also find a case included for easy storage of the filter.

Even better photo quality

The filter is designed to absorb the majority of UV rays reaching the lens while ensuring colour neutrality. The lightweight filter is coated with a special coating to ensure optimum image quality while protecting your lens from debris and scratches. Now your images will be even better and you will have peace of mind about your lens.

GimbalSafe technology

Freewell is committed to high quality workmanship and subjects its products to rigorous testing, so you can rest assured that your drone will be safe. The filter has an ultra-lightweight frame that won't weigh down your device or affect its balance. Every flight will be even safer with the Freewell UV filter.

Protective coating

For the best results when shooting outdoors, the filter has acquired a special coating, making it dustproof and scratch-resistant. Photos of speedway racers? Why not! Your lens won't suffer! What's more, the oleophobic coating prevents greasy stains and fingerprints, so keeping the filter clean will not be a problem.
