Smart plug ZigBee Sonoff S26R2TPF (Type F)

Ref: 6920075740080

Sonoff S26R2ZBTPF smart socket

Create a smart home that feels good to live in. The Sonoff brand smart outlet allows you to remotely control connected devices via an app, as well as create work schedules and scenes. It's also compatible with voice assistants like Amazon Alexa. It will also work well as a signal booster for other ZigBee equipment you use.

Remote control of your devices

Have you ever forgotten to turn off the lights before leaving the house? It is not a problem anymore! The socket allows you to remotely control connected devices via an app - with just a few clicks you can, for example, turn the selected equipment on or off. The product is also compatible with Amazon Alexa, Google Assistant, Samsung SmartThings and IFTTT.

Voice control capability

Want to turn on the light or boil water for tea, but your hands are busy? The socket is compatible with voice assistants such as Amazon Alexa, so with just a few words you can conveniently operate the device connected to it. Simply issue the appropriate command and watch as the kettle starts boiling water and the lamp turns on!

Create work schedules and smart scenes

Adjust the work of devices in your home to your schedule. The socket allows you to create schedules for them - you can, for example, make the coffee maker turn on automatically at 7:00 and the lights go off at 23:00. You can also create smart scenes using additional sensors (not included). This way you can, for example, make the fan turn on when the room temperature exceeds 28°C.

Wide compatibility - more options

The outlet can also act as a router and transmit the signal between ZigBee devices. You no longer have to worry about poor connection quality! The product is also distinguished by its wide compatibility. It works perfectly with various models of ZigBee hubs from brands such as Amazon, Samsung or Philips. It also works with Amazon Echo 4th gen.

Additional features

The app also provides access to several additional features. For example, it allows you to synchronize the status of your devices. You can also share remote control with your family members or friends. With just a few clicks, you can share your plugged-in devices with them and allow them to control it conveniently from a distance.

Brand

Sonoff

Model

S26R2ZBTPF

ZigBee

IEEE 802.15.4
