

Camera Akaso EK7000

Camera Akaso EK7000

Ref: 819847017009

Akaso EK7000 sports camera

Do you need a camera that will allow you to get high-quality, dynamic recordings and sharp images? Akaso EK7000 is just for you! The device records video in 4K/25FPS and has a number of functional modes. You'll also find a waterproof case and a remote control, so you can feel the real comfort of operation.

Top quality

The camera offers 4K/25FPS video quality and up to 12MP photos. This ensures sharp, detailed shots that will take you back to your most beautiful memories. When you choose Akaso, you choose the best!

Multiple modes available

The device provides access to a number of functional modes, so you can tailor its operation to your specific requirements and circumstances. Do you want to record a timelapse, loop or take a sequence of continuous shots? Just choose a specific setting! What's more, you can also use the wide-angle mode and capture anything within 170° of the lens.

Thoughtful design

Included with the camera you will receive a special waterproof case, so you can take the camera on a diving session - up to 30 meters

deep. A waterproof remote control with a wrist band will allow you to operate it conveniently without the interface of the device itself. The kit also includes a variety of practical mounts that expand the mounting possibilities of the equipment.

Everything at hand

If you want easy access to your recorded footage, install the AKASO GO app. You can share your shots via Wi-Fi and manage them via your smartphone or tablet.
