

360° Indoor Wi-Fi Camera IMOU Ranger RC 5MP

360° Indoor Wi-Fi Camera IMOU Ranger RC 5MP

Ref: 6971927234974

IMOU Ranger RC 5MP Wi-Fi indoor rotating camera

The Imou Ranger RC 5MP camera is a fantastic choice for those who value security and multi-functionality. The intelligent system detects threats and sends notifications to your phone for immediate response to unusual sounds or human presence. The built-in siren acts as a deterrent to uninvited guests, increasing security. A unique moving object tracking feature ensures that nothing escapes your attention. Privacy mode, activated via the app, reverses the lens and sets up a physical barrier to protect your privacy. In addition, the touch button allows two-way audio communication, so you can call directly from the camera to your smartphone app, but that's not all of the benefits of the Imou Ranger RC 5MP!

Advanced Detection and Alarms

One of the most important features of the Imou Ranger RC 5MP camera is its intelligent threat detection and notification system. When the camera notices unusual sounds or human presence, it immediately sends a notification to your smartphone. This allows you to act proactively before the situation gets out of hand. What's more, this feature is extremely useful not only for burglary prevention, but also for monitoring small children or pets.

Built-in Siren

The built-in siren is another feature that makes you feel calmer about the people, pets and belongings that are precious to you. It acts as

an instant deterrent to uninvited guests, activating automatically or manually via the app. This not only increases the level of security, but also gives you a sense of control and reassurance that your home is well protected.

Following Objects

The function of following moving objects is another asset of the Imou Ranger RC 5MP camera. Thanks to advanced motion analysis algorithms, the camera can follow moving objects, such as people or animals, providing continuous and accurate observation. This feature is particularly useful in situations where you want to make sure you don't miss anything.

Privacy Mode

Your privacy is very important, so the camera offers a privacy mode that can be activated via the app. When it's activated, the camera reverses the lens and activates the physical barrier, so you can feel at ease in your home without worrying about recording unnecessary footage.

App Connection and Two-Way Audio

With the touch button, you can call directly from the camera to the app on your phone. The camera is also equipped with a built-in microphone and speaker, enabling two-way audio. So you can not only hear what's going on in the monitored area, but also communicate with people within range of the camera via the app. All you have to do is press the touch-sensitive button located under the lens, and you can call the person whose app is configured with the camera.

Technical characteristics

The Imou Ranger RC 5MP camera offers an impressive 5MP(2688 x 1664) resolution for extremely accurate and detailed images. With a low power consumption of less than 5W and a wide operating temperature range of -10 to +45 degrees Celsius, the device is energy efficient and rugged. With a housing measuring 80 x 80 x 110.4mm and weighing 171g, the camera is compact and easy to install. In addition, the device offers a night vision range of up to 10 meters and a versatile 3.6mm fixed focal length lens. As for data storage, the camera supports microSD cards up to 256GB and offers H.265/H.264 video compression for efficient storage space management.
