

Battery/ jump starter Lokithor - 2500A 12V 55Wh

Ref: 6928493308790

Battery/ jump starter Lokithor - 2500A 12V 55Wh

A Battery/Jump starter Lokithor, lithium- 2500A 12V 55Wh.

Battery/Jump starter Lokithor is an indispensable tool that meets many needs. It works as a starter, voltmeter, flashlight and power bank. With it you can bring your car back to life, brighten up your neighborhood at night or charge your devices such as your laptop cy phone thanks to the included USB-A cable with a USB-C connector. As a flashlight, the device has three light modes, including a red SOS light, further increasing its usefulness.

Resistant to extreme conditions

This rechargeable battery is ready for harsh conditions. It has a certified IP65 waterproof rating, which means it is resistant to water, dust and drops. Whether you're outdoors or in the city, Lokithor will live up to expectations and protect your device during every use.

Powerful power for a variety of vehicles

With a massive 2500A of power and a starting voltage of 12V, this battery is versatile in terms of the vehicles it supports. It is perfect for 12V vehicles with gasoline engines up to 7 liters or diesel engines up to 4.5 liters. Whether it's a car, motorcycle, boat or camper, Lokithor is ready to help.

Safety and performance

Thanks to NTC thermistor technology and advanced microprocessors, the Lokithor battery effectively monitors temperature, preventing skin burns. Built-in safety features, such as short-circuit, overcurrent and overheating protection, guarantee peaceful use. In addition, as a LiFePO4 battery, it offers longer life and takes up less space compared to traditional lead-acid batteries.

A kit full of possibilities

The kit includes everything you need to use the Lokithor to its full potential. In addition to the battery itself, you get starter terminals, a 12V adapter, a USB-C cable, a USB-A and USB-C cable, and an instruction manual. It's a comprehensive solution that allows you to use the device immediately.

Impressive specifications

The J2500 from Lokithor is a guarantee of performance and safety. With USB-A (18 W)/Type-C (PD60 W) output voltage, this battery pack is also an effective power bank for charging multiple electronic devices. Its 2500A peak current and 55Wh capacity make it an indispensable companion for any travel or emergency situation.

The set includes:

- Battery
- Starting terminals
- 12V adapter
- USB-C cable
- USB-A and USB-C cable
- User manual
- Brand.
- Lokithor
- Model
- J2500
- Initial voltage
- 12V
- Capacity
- 55Wh
- Storage temperature
- -20°C ~ 50°C
- Luminous flux
- 300 Lumens
- Output voltage
- USB-A: 5V/3A, 9V/2A, 12V/1.5A (18W max), USB-C: 5V/3A, 9V/3A, 12V/3A, 15V/3A, 20V/3A (60W max)
- Battery type
- Lithium Iron Phosphate (LiFePO4)
- Peak current
- 2500A
- Charging temperature
- 0°C~45°C
- Operating temperature
- -20°C~50°C
- Input
- DC: 12V/5A (60W max), USB-C: 5V/3A, 9V/3A, 12V/3A, 15V/3A, 20V/3A (60W max)
- IP code
- IP65
