

Bike flashlight Superfire GT-R3, 600lm, USB

Bike flashlight Superfire GT-R3, 600lm, USB

Ref: 6956362994478

Superfire GT-R3 bike light

Have you ever ridden your bike without proper lighting? Riding in the dark when you can't see objects on the road or approaching people is not only difficult and annoying, but also dangerous. The GT-R3 bike light by Superfire will help you solve similar problems! It provides bright light that you can adjust to your needs, choosing from 6 available modes. The device is easy to install and looks great, it is also IPX5 rated. The long-lasting battery gives you a long runtime. GT-R3 can also be used as a flashlight.

6 light modes - choose the right one for you

The lamp offers as many as 6 light modes, so you can easily adjust it to the road conditions, as well as to your requirements and habits. You can select 100% or 50% floodlight, 100% spotlight and 100% floodlight and spotlight. You can also choose a strobe or a breathing red light on the side of the unit. GT-R3 will meet the needs of even the most demanding cyclists!

Long runtime

You don't have to worry that the flashlight will refuse to work when you least expect it. GT-R3 is equipped with a battery with a capacity of 2400mAh, which is characterized by high durability. Depending on the selected mode, the device can work for up to 2-7 hours on a single charge. To charge the light, simply connect it to a power source using the built-in micro USB port. Indicators placed on top of the device will provide you with information about the status of the battery.

Reliable in all conditions

Are you not afraid of even the most diverse conditions on the road? Get yourself a flashlight that can handle it! The GT-R3 is IPX5 rated, which means you can use it in the sun or rain without worry. Water jets don't pose much of a threat to it. With Superfire, you can safely escape a downpour and get home to dry off and stay warm.

Designed for your convenience

The durable aluminum alloy not only makes the flashlight resistant to damage, but also gives it a modern, stylish feel. On the top of the casing, there is a sensitive button, with which you can conveniently operate the device. Installation of the flashlight is child's play - just use the practical armband, which allows you to quickly and stably attach it to the handlebar of your bike.

Useful in various situations

The lamp provides a bright light, which combined with its adjustability allows you to use it in different ways. GT-R3 will come in handy during a night cycling trip, and also in a situation when your planned return home is delayed, and you need to ride after dark. Want more? Nothing prevents you from using this practical device as a flashlight!
