Filter 1/4 Snow Mist Freewell DJI Mini 4 Pro

The Freewell 1/4 Snow Mist filter for the DJI Mini 4 Pro drone is an essential tool for any aerial photography and filming enthusiast. It will help you achieve smooth transitions and amazing subtle lighting effects, eliminating excessive glare and harsh shadows while gently diffusing light. It is also ideal for enhancing skin tones, reducing detail distortion in portraits and maintaining exposure balance in challenging lighting conditions. It will make your drone photos and videos look even better.

Top quality workmanship

High-quality German optical glass has been used to make the filters. They are characterised by colour neutrality and exceptional scratch resistance. The filters have also been treated with a special coating that provides effective protection against water, dust and oil. So you can be sure that the filters will remain intact, no matter what conditions you are working in.
