

Blue Anamorphic Lens 1.55x Freewell for Galaxy and Sherp

Ref: 6972971863479

Blue Anamorphic Lens 1.55x Freewell for Galaxy and Sherp

Blue Anamorphic Filter 1.55x by Freewell for Galaxy and Sherpa

Discover the essence of mobile cinematography with the Freewell 1.55x anamorphic filter, which will enhance the capabilities of your smartphone and make it easier for you to create masterpieces. With the PRESS TWIST LOCK mounting system, you will always be ready to capture unique moments. This accessory is dedicated to cases from the Sherpa and Galaxy series.

Precision Mounting System

The Freewell filter is designed for filmmakers who value their time, utilizing the intuitive PRESS TWIST LOCK mounting system, which ensures quick and secure attachment of the lens to your device. A light twist is all it takes to secure the filter, allowing you to focus on your creative process without technical hindrances.

Attention to Detail

The Freewell anamorphic filter guarantees exceptional image quality. By employing advanced technologies such as a high refractive index and minimal dispersion, it provides crystal clarity and impeccable sharpness from the center to the edges of the frame. This accessory sets new standards in smartphone filmmaking.

Unleash Your Imagination

Achieving a 2.76:1 aspect ratio, typical of cinematic productions, has never been easier! The Freewell anamorphic filter horizontally compresses the image, expanding your creative possibilities and allowing you to capture more space in every shot.

Let the Colors Enchant You

The blue filter adds elegance and a futuristic mood to your content, making your videos and photos look even better! Furthermore, you can enhance the quality of your creativity by equipping yourself with separately available ND, MIST, or CPL filters.
