Mechanical keyboard Dareu EK1280 RGB (black)

Dareu EK1280 Keyboard

Gaming equipment is extremely important because its quality often determines the winner. Dareu knows this and by creating the EK1280 keyboard, the company has met the expectations of buyers. Its innovation is evidenced by such features as mechanical switch with a lifespan of up to 50 million clicks, adjustable RGB backlighting system, N-key rollover, ergonomic and minimalist design. The device also supports multimedia buttons.

Reliable mechanical switches

The EK1280 keyboard has built-in mechanical D-switches with a lifespan of up to 50 million clicks. They yield easily to your fingers and provide fast response. What's more, with N-key rollover, you can be sure that every keystroke is properly registered. Furthermore, the force required for activation red switches is only 45g and the activation point is 2 mm.

Gaming RGB backlighting

Colorful RGB backlighting is eye-catching and gives the keyboard a unique feel. You can also choose from the available light modes to customize its look to your liking. To change the RGB effect, just use the right key combination!

Thoughtful design

The device features a well thought-out, ergonomic design so you can enjoy the comfort you dream of when you play. What's more, the keycaps are made of durable ABS plastic and the characters on the keycaps are resistant to abrasion. All this means that this keyboard can serve you well for a long time.

Multimedia Keys

What else makes the keyboard so user-friendly? The device is equipped with multimedia keys that provide convenient access to several useful functions. With just the right combination of buttons, you can, for example, adjust the volume or use the quick search capabilities.
