ND-PL 8/16/32/64 Filter Set for DJI Air 2S PGYTECH P-16B-063

Looking for a way to enhance the quality of images captured with your DJI Air 2S? Try out PGYTECH's hybrid ND-PL filters, which prevent unwanted reflections and ensure vibrant color saturation. They also enable capturing incredibly smooth aerial footage. Made of high-grade German SCHOTT glass and aviation-grade aluminum, they are incredibly lightweight yet durable. Special protective coatings shield them from dirt and damage. The filters are also easy to mount and feature perfect compatibility with the DJI Air 2S.

Top-Quality Image

Creating stunning aerial films and photographs can be easier than you think. Crafted from repeatedly polished SCHOTT glass, ND-PL filters deliver fantastic color saturation and unparalleled image sharpness and clarity. They also eliminate unnecessary reflections. They are also perfect for filming, allowing for shorter shutter speeds and preventing overexposure, resulting in incredibly smooth, cinematic shots. You can also adjust the polarization effect by rotating the filter.

Forget About Cleaning Issues

The accessories are remarkably durable and easy to maintain. They are covered with a two-sided, multi-layer nanopowder coating that repels water and grease, making it easy to keep them clean. The filters are also scratch-resistant. They will serve you well for a long time.

Designed for DJI Air 2S

Worried that the accessories will excessively weigh down the drone and affect flight quality? Unnecessarily! Each filter weighs only 2 grams. The frame made of CNC-machined aviation-grade aluminum provides them with incredible lightness and durability. It also boasts corrosion resistance. The products are perfectly tailored to the DJI Air 2S. They won't disturb its balance and will allow you to enjoy smooth, exhilarating flights.

Manufacturer

PGYTECH

Name

DJI Air 2S Filter (Professional)

Model

P-16B-063

Material

Aluminum, optical glass

Net Weight

2 g x4

Dimensions

29x23.6x5.1 mm

Filter Effect

Polarization lock, shortened shutter speed, film - motion blur effect, photography - longer exposure time

Impact on Colors

Reduced haze effect, prevention of overexposure, increased saturation/contrast, enhanced clarity

Intended Use

DJI Air 2S

Price:

Before: € 57.9945

Now: € 52.00
