

Laminator A4 Deli E2132

Laminator A4 Deli E2132

Ref: 6935205344205

Deli E2132 A4 Laminator

The Deli laminator will preserve important documents or photos for longer and prevent them from getting damaged. The device's warm-up time is about 5 min, and its speed is 220 mm/min.

Protecting your documents

The E2132 allows you to laminate, for example, contracts, certificates, photos, credit cards or drawings. This will protect your documents from fading or damage.

Efficient operation

The Deli laminator takes about 5 minutes to heat up, so you don't have to wait long until it's ready to operate. Moreover, its operation speed reaches 220 mm/min, which will save you time. It is recommended to use 70-100 micron laminating pouches.

Convenient operation

The device is equipped with large buttons and light indicators for easy operation. A red indicator indicates that the laminator is heating up, while a green one indicates that it is ready for use. What's more, you can use the reverse function to eject the film if, for example, it has been placed at an angle.

Manufacturer

Deli

Model

E2132

Max. lamination width

230 mm (A4 format)

Maximum laminating thickness

≤ 05. mm

Thickness of laminating pouch

70-100 mic

Voltage

AC 220-240V 50Hz

Laminating speed

220 mm/min

Working temperature

85°C - 145°C

Power

265 W

Noise level

≤55 dB

Warm-up time

approx. 5 min

Dimensions

330 x 108 x 60 mm

Weight

1 kg

Price:

€ 26.00
