Earphones TWS EarFun Free Pro 3, ANC (black)

TWS EarFun Free Pro 3 headphones, ANC (black)

Looking for reliable headphones that can accompany you almost anywhere? The device from EarFun will be perfect for you! They stand out for their long operating time (up to 33h!), noise cancellation, and most importantly, they will surprise you with their exceptional sound. In addition, they feature easy control. See what else EarFun headphones can surprise you with!

Reliable wireless connection

EarFun headphones were created with comfort in mind, so they use Bluetooth 5.3 technology, so you can be sure of a fast, stable and interference-free connection. What's more, pairing the headphones with the device of your choice is very easy and fast. In addition, if they are not connected to any equipment, they will automatically turn off after 10 minutes to save energy.

Comfort of use

The EarFun device will surprise you with excellent sound quality, as they use modern technology. Equipped with a noise cancelling function, they can level sounds up to 43 dB! This allows you to focus on what matters most - your beloved songs. In addition, these headphones allow you to talk freely on the phone, as they are equipped with up to 6 microphones. And thanks to their light weight, they will be very comfortable to use.

Easy control

What sets EarFun headphones apart is their easy control. You have all the most important functions at your fingertips! With just a few clicks on the headphones, you can switch a song, increase or decrease the volume, turn on noise cancellation or answer a call, among other things. A voice assistant is also at your disposal. You can also download the EarFun App to your phone, giving you access to more features and equipment personalization.

Long working time

Worried that your headphones will quickly lose their power? With EarFun, you can put those fears behind you! With the ANC function turned off, their working time reaches up to 7.5 h - but you can extend it to 33 h with the help of a charging case. With ANC on, this time reaches 6 and 27 h respectively. What's more, the headphones are equipped with an LED indicator that lets you know when the equipment is working. EarFun equipment energy depleted? You can recover it in as little as 1.5 h! You can also charge the case via a wireless charger - the time to recover full energy in this case is 3.5 h.
